MAINTENANCE AND STORAGE

Daily maintenance:

The following maintenance should be done after daily job.

1. Cleaning the dust on the surface of the machine.
2. Clean the chemical tank with clean water and wipe it dry.
3. Check if there is any leakage of water. If there is a leakage, remedy procedures are to be taken.
4. Check to see if the screws are loose or lost. If so, please tighten the screw or replace.
5. The machine after maintenance should be stored in a place which is dry and has good ventilation. It must be far away from any fire source and sunlight.

Long term Storage:

The machine which is to be stored for a long time should be maintained as follows:

1. Clean the machine surface carefully.
2. Discard any chemical in the tank and the pump, clean them with clean water.
3. All the plastic parts must neither be exposed to the sunlight nor pressed by heavy matter.
4. Cover the machine with plastic dustcoat and store in a dry and clean place.

BEFORE GETTING STARTED

Thank you for your purchase and use of our products. In order to avoid accidents or injury, **please read this manual carefully** before using. After reading, preserve it for further reference.

APPLICATION

The pressure sprayers developed by our company are safe, economic and efficient in nature. Its structure is new and modelling is unique making it highly comfortable for usage and spraying evenly. It is especially suitable for prevention and cure of diseases and insect's violation of crops, for blowers, plants and gardens, for environmental sanitation of public places, epidemic prevention near hotels, stations and sanitation of livestock poultry sheds.

SAFETY INSTRUCTIONS

1. Read this manual carefully, be sure you understand how to operate this machine properly before you use it.
2. Protective Clothing:

- Wear flange cap.
- Wear dirt/fog-proof glasses.
- Wear gauze mask.
- Wear long gloves.
- Wear coat guarding against poisons.
- Wear boots.

3. Following personnel should not use the machine:
 - Mentally challenged.
 - Drunk.
 - Under the age of 18 or older people.
 - Person with no knowledge of the machine.
 - Tired person or patient and others who cannot operate the machine normally.
 - A person who has just exercised strenuously or has not slept enough. Women feeding breast milk to the baby or is pregnant.
4. Spraying
 - It is fine to carry out an operation during cool weather with little wind. For example, early in the mornings or in the late afternoons as this can reduce the evaporation and drift of chemicals and improve the protective effect.
 - The operator should move windward.
 - Do not spray the pesticide at other people, animals and foodstuff.
 - If your mouth or eyes are splattered with chemicals, wash them with clean water and then visit a doctor.
 - If the operator has a headache or dizziness, should stop working at once and consult a doctor immediately.

- For the operator's safety, misting/dusting must be carried out strictly according to the instruction of the chemicals and agricultural requirements.
 - Spray over, according to pesticide manual to clean out any residual spray mixture in chemical tank.
 - After spraying always wash your hands and face thoroughly.
5. Warning:
- Check if the parts in the package coincide with the packing list.
 - Don't use it to spray corrosive liquids, strong acid or alkali, coal, oil and other volatile liquid in order not to catch a fire or get any burns.
 - It will harm persons and crop if the chemical liquid is mixed improper. Please read the introduction of pesticide before using it.
 - It is prohibited to put the pesticide into other containers in order not to prevent any accidental consumption.
 - In order to avoid incidents incurred by clinging to the pesticide, the operator must wear flange cap, fog-proof glasses, gauze mask, long gloves, and coat guarding against poisons, boots and some other protective clothing.
 - After operating, the operator must wash the whole body with water and soap. In the meantime, the operator must wash eyes with clean water, and change clothes every day within the period of operation.
 - Don't let the deposit or the water used for cleaning the machine flow into river, lake, pond, in order not to avoid pollution.
 - The machine should be cleaned completely, be dried and charged fully after using, and then should be kept in a cool and windy place.
 - Do not operate under high temperatures for prolonged time.
 - It is also strictly forbidden to use high toxic and high residual pesticide for the insects of vegetables melons, guards, fruits, tea and medical herbs. Strictly control the safe period collection after applying pesticide.
 - After operation, please clean the sprayer, in order to avoid the medicinal liquid corroding the spray machine or blocking up the spray head. It also avoids residual pesticide mixing with the next different pesticide which may cause a chemical reaction and influence the effect of the pesticide or harm the crops.

OPERATION

FB-PS-1L/1.5L/2L/3L:

1. Check if the screw cap (1) is firmly closed.
2. Fill the high pressure sprayer as far as the line (1/1.5/2/3) and close the screw cap (quantity of liquid not more than the recommended line, otherwise the sprayer develops insufficient pressure)
3. Pump (2) until resistance is felt (approximately 30 strokes). Spraying by pressing lever (3).
4. Engage trigger lock for continuous spraying (4).

NOTE: After use spin the top a quarter turn to release the remaining pressure do not store pressurized and release trigger lock.

FB-PS-5L/8L:

1. Pull up the nozzle of pressure release valve, to release the pressure, then unscrew the air pump and take the pump out of the tank.
2. Fill the chemical(spraying material) and close the lid such that it is air tight
3. Pump the liquid until the pressure builds up in the tank.
4. Now lock the pump handle.
5. Press the trigger to spray.
6. Once the spraying process is over, before opening the lid, ensure no pressure is present in the container. To achieve this, release the pressure by pulling up the pressure regulator.
7. Please clean inside the tank carefully after use.
