

Important: (1) Normal maintenance and adjustments to the product is the responsibility of the customer. (2) Normal wear and tear is not covered under warranty. (3) Rubber/plastic parts and consumables such as blades, clutch and clutch-bell, spark-plugs, nylon line, air-filters, fuel-filters, oil seals etc. are not covered under the warranty.

No Warranty On Electrical Motor / Electrical Parts / Battery Etc.

Incidental / Consequential Loss: KisanKraft Limited or its manufacturers will not be liable for general damages, including bodily injuries, or for incidental or consequential damages including, but not limited to, loss of use, loss of profits, loss of production, expense of substitute equipment or other commercial loss or damage.

Limitation of Liability: This limited warranty is in lieu of all other express warranties, obligations, or liabilities. Any implied warranties, obligations or liabilities, including, but not limited to, any implied warranty of merchantability shall be limited in duration to the applicable warranty period. Any action for breach of any warranty hereunder, including, but not limited to, any implied warranty of merchantability must be brought within the applicable warranty period.

Modifications of Warranty: No agent, representative, dealer, or employee of KisanKraft Limited or any of its manufacturers has the authority to increase or alter the obligations of this warranty.

Assignment / Transfer of warranty: The warranty cannot be assigned and shall not transfer if the product is resold by the first buyer. The above warranties are extended to the first end user (original purchaser), and no warranty is made, nor authorized to be made assignable on resale by the first end user.

What you must do to obtain limited warranty service: To obtain performance of any obligation under this warranty for failure during the applicable warranty period, deliver the defective product, to the nearest Authorized Dealer. KisanKraft Limited, its manufacturers and its dealers reserve the right to inspect the claimed defective part(s) to determine if the malfunction is the result of a defect covered by this warranty. Please note that the decision of KisanKraft Limited with respect to any warranty claim is final.

Receipt is required for availing warranty services

Jurisdiction: All disputes are subject to Bangalore court's jurisdiction.

7. Before starting the machine, check if the screws in all parts are intact, if found loose, tighten it. While working, people and objects must not be close to the running part.
8. Turn on power, run at idle speed for a few min, & then normal operation can be started.

Equipment Maintenance

1. It is strictly forbidden to smudge the surface of the machine to avoid paint damage.
2. Gears, bushings and all rotating parts should be applied oil to ensure good lubrication. Rolling bearings should be filled with lithium grease every year to avoid damage.
3. If the blade is blunt (8 hours or so), it needs to be sharpened on time.
4. After using the mower, remove the grass and dust from the machine, cover with a dust-proof cover, and keep it in a safe place.
5. If the machine is not in use for a long time, it should be used in accordance with the provisions of "Installation and operation" when it is used again.

Troubleshooting

Problem	Probable Cause	Remedy
Cutting grass is uneven in length	1. Dynamic and fixed knife clearance is too large	1. Adjust the movement and the fixed knife clearance
	2. Blade is not sharp	2. Sharpen the blade edge
There is an unusual noise	1. There are hard objects such as iron wire in the grass.	1. Pick up hard objects in grass
	2. Fasteners are loose	2. Tighten the fasteners
	3. Lack of oil at the rotating part	3. Add oil lubrication
	4. The clearance between moving and fixed knife is too small.	4. Adjustment setting, knife clearance
Difficult to feed	1. The feed is too large	1. Reduce feed intake
	2. The grass roller was entangled with grass.	2. Shutdown clear
	3. The spring tension is too large or broken	3. Replace the spring with the right tension

KisanKraft Limited (Formerly known as KisanKraft Machine Tools P Ltd.)

Before Getting Started

Thank you for your purchase and use of our products. In order to avoid accidents or injury, **please read this manual carefully** before using the machine. After reading, preserve it for further reference.

Use and Characteristics

KK-FMC-1200 is the latest model developed by our company. It is compact, small in size and light in weight. It has characteristics like all-steel structure, safe and reliable, single-phase power supply, convenient operation, uniform grass length, and so on. This machine is mainly used for cutting all kinds of crop straws and various forages such as green and dry corn straw, etc. An ideal helper for breeding cattle, sheep, horses, deer and other livestock.

Safe Operating Procedure

1. The operator should familiarize himself with the "User Manual" of this machine, and fully understand the performance of the machine. It is strictly forbidden to start work with sickness or excessive fatigue or after consuming alcohol.
2. Individuals under the age of 16 and over 65 years old and those who do not understand the rules for the use of this machine are not allowed to work alone.
3. Operators should wear tight-fitting sleeves & long-haired people should wear safety helmets.
4. The working area of the mower should be spacious and equipped with fire protection equipment.
5. When you feed, you must not extend your hands into the import shield. It is strictly forbidden to feed wooden sticks, metal, stones, etc. into the machine.
6. Do not reverse the cutter wheel, It is not allowed to increase the spindle speed and to remove the guards of various parts during operation.
7. The fasteners of the moving and fixed blades are high-strength bolts. When they need to be replaced, they should not be replaced by ordinary fasteners.
8. If abnormal noise is found during work, it should be stopped immediately and the power must be cut off before the inspection. It is forbidden to troubleshoot when the machine is running.

Installation & Operation

1. Install the attached accessories.
2. Open the upper shell of the chaff cutter, confirm that there is no impurity in the machine and the feed table, so that it can be assembled with the power.
3. The installation of motor should ensure the alignment of two pulley grooves, the triangle belt is just right, the steering of the main shaft should be in the same direction as the arrow of the belt guard. Install the belt guard.
4. The switch should be installed near work site, to turn the power on or off at any time.
5. The gap between the movable knife and the fixed knife should meet the 0.1-0.3mm standard (the softer grass takes a small value, and vice versa); if it needs to be adjusted, loosen the fixing nut and knock the knife with a small wooden rod to make it when entering or retreating, when checking the clearance with the feeler gauge, tighten the fixing nut and check the clearance until the requirements are met.
6. The machine should be placed in a stable position, and the grass outlet is consistent with the natural wind direction.
